WORK EXPERIENCE

New Reddit (*November 2017 - Present*)

- Reverse-engineered reddit.com using MEAN stack
- Built RESTful API in Express for CRUD operations
- Implemented session persistence layer in MongoDB
- Followed object-oriented paradigm and adhered to MVC pattern with Angular

Sean-Mooney.com (*September 2017*)

- Followed mobile-first design approach with Bootstrap grid system
- Constructed custom contact form with validation in PHP to send emails on submission
- Created media gallery and lightbox in JavaScript to cater to specific needs

CPMooney.com (*April 2017*)

- Hacked Squarespace to incorporate client-side pagination
- Designed logo and comps in Photoshop
- Styled custom buttons to comply with Material design practices

Project Xavier (*July 2016 - September 2016*)

- Developed in an Agile team environment using Git for version control
- Integrated search functionality with filtering and autocomplete
- Constructed access control lists and user moderation functions
- Architected schemas to persist data in NoSQL store
