COMPETENCIES

- HTML/CSS
- Angular
- Android
- JavaScript
- GraphQL
- MongoDB
- Ionic
- iOS
- Photoshop

WORK EXPERIENCE

Communico LLC *(December 2017 - Present)*

SOFTWARE ENGINEER

- Engineered library software platform from room booking tablets to event feeds and mobile applications
- Interfaced with and maintained a RESTful API for CRUD operations
- Tracked down and fixed bugs across the entire full stack environment
- Migrated large legacy content sets from third-party providers to new databases
- Managed and deployed customer apps in multiple developer accounts

Project Xavier *(July 2016 - September 2016)*

- Integrated search functionality with filtering and autocomplete
- Constructed access control lists and user moderation functions
- Architected schemas to persist data in NoSQL store

PERSONAL PROJECTS

Sean-Mooney.com *(September 2017 - November 2018)*

- Followed mobile-first design approach with Bootstrap grid system
- Constructed custom contact form with validation in PHP to send emails on submission
- Created media gallery and lightbox in JavaScript to enlarge and navigate through images

EDUCATION

Independent Software's A100 Program

Software Developer, Summer 2016

Norwalk Community College

Associate of Computer Science, 2015
